All the best and enjoy. 2.To access this menu, hold the button with the volume and power keys. You will see all the options and toggles that are available to you. 3.To see all the options and toggles, the device should be in 'OFF' state. 4 Once you see all the options and toggles, you can unplug the charger and you can switch it on. 5. You can also choose to turn on the device in off-mode. The above steps will help you in uninstalling CyanogenMod 10.1 from your device. If the volume and power buttons are showing 'soft' then the battery life is very less. Try to recharge the device. If the volume and power buttons are not working then the device is damaged. Then you need to take it to the service center. If you have any problem in uninstalling the firmware, let me know. After uninstalling, kindly follow the below steps to turn off CM10.1.1. From your phone menu, go to Settings > About Phone > Press and Hold Volume Up + Power Key. 2.Once you see the menu, you can see a message that you have updated to CM10.1. 3.Now, power off your device. Press and hold the volume and power buttons for 5 secs. You will see a menu with the options of the CM10.1 4.Go to reboot options and choose Reboot. The device will reboot and you will see the CM10.1. If you see the message of 'Update failed' then it means the device has not been unlocked. Now turn on the device, press and hold the power key and volume down buttons together for 10 secs. Now you will see the 'Reboot Options' 5.Go to 'Reboot Options' and choose the option to go back to CM10.1. 6.The device will reboot and you will see the CM10.1. Hope you like the tutorial and do comment and share. Please feel free to contact us for any query or suggestion that you might have. UNPUBLISHED 82157476af
